

Celltraq IR 1.0.3 Update from 1.0.2

Prepare for Update

1. Log onto Celltraq Server
2. Open Windows Services window
3. Locate and stop the *SQL Server* service
4. Locate and stop the *Apache Tomcat* service.
5. Make a backup copy of the *C:\celltraq* folder

Update to Celltraq 1.0.3 [Found Celltraq 1.0.3 Folder]

6. Copy provided Celltraq **Server** folder to *C:/Celltraq* folder
7. Copy the backed up *C:\celltraq\Server\config\license.dat* file to
C:\Celltraq\Server\config

Log4j Files [Found in Log4j 2.17.1 Folder]

8. Ensure *C:\celltraq\Server\WEB-INF\lib\log4j-1.2.15.jar* file is not present in folder
9. Ensure the **log4j-1.2-api-2.17.1.jar** and **log4j-api-2.17.1.jar** files are present in
C:\celltraq\Server\WEB-INF\lib

Restart Services

10. Start SQL Server Service
11. Start Tomcat 9.0 Service
