

'10000001814 - Celltraq Enterprise IR for Wired BMS'**RELEASE HISTORY**

VERSION	DESCRIPTION	EFFECTIVE DATE	ECN
1.0.3	Log4j Vulnerability Fix	2022-03-02	111116
1.0.2	Various Bug Fixes	2021-10-07	108271
1.0.1	Application Update and Documentation Update	2020-10-22	743536
1.0.0	Initial release	2020-03-23	739048

RELEASE NOTES**1.0.3 - Log4j Vulnerability Fix, 03/02/2022**

Fix

- #6511: Update SW installation package to address log4j vulnerability

1.0.2 – Various Bug Fixes, 10/07/21

Bug Fixes

- #5738: Create new Battery Library with Resistance values
- #5739: Remove reference to handheld testers
- #5740: Alter Limit settings reference conductance
- #5741: Remove reference to Alert Types
- #5742: Remove reference to Conductance in Reports
- #5743: Remove reference to Conductance in SNMP Traps
- #5953: Displayed Thresholds on String Indicator
- #6058: Franklin Interface Add Strap Resistance Measurement to polling
- #6098: Franklin Interface stop functioning when a configured non communicating control module exist
- #6137: Remove Mhos as Units and replace with micro-ohms
- #6145: Hard Coded table header "G" for conductance in Reports of Battery Specification.
- #6146: T-Comp calculation for Resistance
- #6214: Disable Adaptive Reference
- #6315: Display String Current all the time

1.0.1 - Application Update and Documentation Update, 10/22/20

New

- Huasu setup application updated from ENCN Tool to CM03N Setup Tool
- Documentation update and rebranded to F.E.

1.0.0 - Initial release, 03/23/20

New

- Initial release.
